RICKS COLLEGE
Course Outline

Managerial Accounting 202 **Sections 4 & 8** **Winter Semester, 2001**
Instructor: Keith Patterson, CPA **Office**: Smith 485 **Hours**: 11-12:00 MWF
Phone: Office 356-1452 2-3:00 MWF
Home 356-9658 1-2:00 W
e-mail address: pattersonk@ricks.edu

Credit Hours: 3.0

Required Text : Managerial Accounting, 9th edition, Ray H. Garrison & Eric W. Noreen, McGraw-Hill, Inc. (Copyright 2000)

Prerequisites: Accounting 201 or equivalent

Course Description & Objectives: Managerial Accounting is structured to build on the foundation of financial accounting concepts which were covered in Accounting 201. The central objective of the course is to introduce basic concepts and procedures of managerial accounting to the student through a combination of reading assignments, classroom discussion-lecture sessions, and outside problem assignments. The course emphasizes the use of accounting data in the decision-making process, and seeks to sharpen the student's analytical and interpretive skills through exposure to many business situations in which accounting data are needed and used by the manager. The course covers product costing, cost behavior, segmented reporting for management, profit planning, standard costing, alternate-choice decision making, capital budgeting, statement of cash flows, and statement analysis. Students will also work with a group in doing a project that will require analyzing a corporation's financial statements. The course provides the skills necessary to work as a junior cost accountant in a manufacturing firm or as a junior accountant in the controller's office of a large organization. Individual entrepreneurs will also gain knowledge of costing and management concepts.

Course Routine: Prior to each class meeting, students are expected to study the chapter material assigned for the day and complete the given assignment. The instructor will normally devote a part of each class meeting to lecture and demonstration of selected items from the assigned materials, the objective being to clarify and elaborate on the selected items because of their special relevance or difficulty. Students are encouraged to ask questions and otherwise enter fully into class discussions.

Assignments:
A. Reading assignments are to be completed before the date listed for initial class discussion. Written assignments, which should be done in pencil, are due at the end of class on the date listed on the assignment schedule, unless otherwise directed by your instructor.
B. Written work will normally be corrected by the students in class. Written assignments more than one meeting late will not be accepted. Each individual problem or exercise will be graded and given a rating. The grading system will be:
2 points: Satisfactory. The written assignment is complete and accurate and is clearly and properly presented in an acceptable form.
1 point: Acceptable work, but deficient in completeness, in accuracy, in clarity of presentation, or in form of presentation. You should do all parts of every problem if you expect to receive full credit for your homework. Assignments turned in one class meeting late will also receive 1 point. Strive to stay caught up at all times. No late deduction when you are sick; write ill on the top of homework.
Zero: Work so deficient in completeness, in accuracy, in clarity of presentation, or in form of presentation that it is not acceptable at all. Work turned in more than one class meeting late will also receive zero points.

C. Written assignments should be done very neatly (both form and content are important) using a sharp pencil and writing on only one side of the paper. Clearly label each problem and problem part in the left margin. Subsequent corrections made to homework in class should be done in pen. QuattroPro, Lotus, Excel or something similar, can make homework less time consuming. You are encouraged to use them for homework!

D. Homework is to be folded lengthwise, with the following information given at the top:
1. Student's name
2. Date
3. Chapter and exercise or problem numbers being submitted.

E. All homework will be due in the regular class session. If homework is handed in at the instructor's office, it will be marked late.

Evaluation:
A. The student's final letter grade will be based on the following criteria:

1. Homework exercises and problems	100
2. Exams (4 exams, 100 points each)	400
3. Project	75
4. Quizzes	100
TOTAL POINTS	675

B. The standard grading scale will be used unless, at the instructor's discretion, a modified curve is deemed necessary.

93 - 100% = A	73 - 76% = C
90 - 92% = A-	70 - 72% = C-
87 - 89% = B+	67 - 69% = D+
83 - 86% = B	63 - 66% = D
80 - 82% = B-	60 - 62% = D-
77 - 79% = C+	Below 60% = F

C. Three or more unexcused absences would lower a student's grade. Attend regularly and clear all excused absences with the instructor.

D. Homework Assignments:

**Chapter 1 - P5, P6, P7
18 - E1, P9, P10, P11, P12, P15
17 - E3, E4, E5, E6, P9, P12, P13
2 - E2, E3, E5, P9, P10, P12
3 & 8 - E3-6, P3-16, P3-18, P3-19, P8-16
5 - E1, E8, E10, P12, P15, P22
6 - E2, P9, P11, P12, P15, P17
7 - E3, E6, P8, P10
9 - E6, E7, E8, P10, P15, P17, P18, P20
10 - E3, P11, P12, P13, P14
12 - E3, E7, E9, P19, P21, P23, P30
13 - P12, P13, P15, P17
14 - E1, E5, E7, P13, P14, P16, P21, P25, P27
15 - E1, P5, P6, P7, P8

**P - Problem, E - Exercise. The number following the P or E is the number of the problem or exercise to be completed.

Homework problems are assigned to help students learn and experience the principles covered in the course. Accounting is something that usually has to be experienced to gain the most from it, although some memorization is essential, too. One cannot learn to play the piano by merely reading and memorizing from a book. Accounting works the same way. Exercises are generally easier than the problems. A variety of each is usually given for each chapter. All homework will be averaged together in calculating a semester homework score. In addition to the written homework, students will be expected to attend the Business Division's Executive Seminar Series and at least two events of the Business Summit.

Exams: Four exams are given in the form of multiple choice questions and work problems. The questions are both subjective and objective in nature. The final is 1/2 comprehensive in order to test the student's retention of the full course material. The exams test student memory, understanding, and ability to analyze and apply concepts covered in the course. Students should read each question carefully and should attempt to answer all problems on the exam. With the exception of the final, all exams will be administered at the testing center. It is the student's responsibility to be aware of the testing center hours and to make sure that adequate time is allowed for completing the exams.

Project: Students will work with a group in preparing a financial statement analysis on a publicly traded corporation. This project will help students better understand the financial statement relationships. Working with a group will provide students a chance to improve their human interaction skills.

Quizzes: Quizzes help prepare the students for the exams. With the exception of Chapter 1, a quiz will be given for each chapter. Each quiz is worth 10 points and all quizzes will be averaged together in calculating a semester quiz score.

Instructor Expectations: Students are expected to come to class prepared each time. Chapters should be read, homework done, questions formulated, etc. for each appropriate class period.

Heber J. Grant said, "*It is not what you eat that benefits you, but what you digest. What you hear today is of no use to you less you put it into practice. Somebody has said, and I have often repeated it: 'Knowledge without practice is like a glass eye--all for show and nothing for use'.*"

Students are expected to meet the objectives as set forth at the beginning of the chapters in the textbook and to stay caught up. Getting behind in accounting is usually devastating to the student's progress and grade. Regular attendance is expected and common courtesies to fellow classmates should be shown at all times. **Visiting with one's neighbor is not acceptable behavior during class time.** (See D & C 88:122) Honesty and integrity are expected - no cheating will be tolerated. Students are expected to abide by the college honor and dress code. Remember that you voluntarily signed your name in an agreement to abide by this code. If you have any questions or concerns, please feel free to discuss them with me.

Student Helps: The following should be recognized as helps available to the student to assist in succeeding in the course.

Instructor: Please see me. Office hours were provided earlier in the course outline and are also posted on my door. Other appointments can be made if necessary. Call me at home if you really get stuck and need some explanation and help. Send me an e-mail if that is convenient.

Textbooks: Use the textbook to its fullest potential. Underline key statements. Follow and work through the examples given. Work extra exercises or problems from the book. Other textbooks may also shed some light on a given problem or subject and are available at the library.

Mortimer Adler said, "*Why is marking up a book indispensable to reading? First, it keeps you awake. (And I don't mean merely conscious; I mean wide awake.) In the second place reading, if it is active, is thinking, and thinking tends to express itself in words, spoken or written. The marked book is usually the thought-through book. Finally, writing helps you remember the thoughts you had, or the thoughts the author expressed.*" He further stated, "*You buy a steak..., but you do not own the steak in the most important sense until you consume it and get it into your bloodstream. I am arguing that books, too, must be absorbed in your bloodstream to do you any good.*"

If you need help in learning how to properly use a textbook and how to mark it up, the Reading Lab in MK E 230 is available free of charge. The Study Skills Lab offers free assistance also. It is located in MK E 200. You may find the student study guide written specifically for this book a helpful tool. In addition, I have placed two copies of the book Scorebuilder--Managerial Accounting on reserve in the library for your use in preparing for examinations. The book contains several typical questions one might find on a managerial accounting exam.

Fellow Students: Group learning can be beneficial. Form study groups if you wish. Be willing to share your knowledge if someone asks you a question. Explaining it to someone else helps reinforce what you already know. Students who have previously completed the course may be able to offer you some help, too.

Class: Attend regularly and on time. Take good, accurate, readable notes. Refer to the examples in the notes. Follow the lecture. Ask questions if you do not understand.

Lab: An accounting lab is available free of charge so that students may get extra help. It is located in room 383 of the Smith Building and is open during the following times:

Mondays and Fridays 4:00 to 6:00 pm
Tuesdays - Thursdays 4:00 to 7:00 pm

Tutoring Center: Students who need help beyond their regular classroom instruction may seek free assistance at the tutoring center. This should be used only as a final measure of obtaining help. Students are urged to explore the other helps first. The Tutoring center is located in MK E 204.

Disability Statement: In compliance with applicable disability law, qualified students with a disability may be entitled to "reasonable accommodations." It is the student's responsibility to disclose to the teacher any special need she/he may have before the end of the first week of class.

Use the helps that are available to you. They are here to help guarantee your success in this course. Accounting is a very rigorous course, yet can be very rewarding for the willing student. The handout "A Study Guide for Accounting Students" may also be of help to you. If you need a copy, please see me.

The following represents a tentative schedule for the class. The instructor reserves the right to make changes, deletions, corrections, or additions during the course. Adequate notice will be given of any changes.

Jan. 9 T Course Outline; Chapter 1 - **Managerial Accounting and**
11 Th Chapter 1; Chapter 18 - Financial Statement Analysis
16 T Chapter 18
18 Th Chapter 18; Chapter 17 - **Statement of Cash Flows**
