3:00 - 4:00 Daily
Other times by appointment

Credit Hours: 3.0

Required Text: Accounting: Information for Business Decisions, Volume 1; by Cunningham, Nikolai, & Bazley

Prerequisites: None

Course Description and Objectives: This course is designed to introduce students to both financial and managerial accounting principles with exposure to basic accounting statements, processes, and management applications. It is designed mainly for nonbusiness majors and certain specialized business programs. The main objective of the course is to help students develop the skills and confidence necessary to apply accounting concepts and techniques in analyzing, planning, and controlling operations of various kinds of organizations.

Code of Honor: All students are expected to fulfill their commitment to abide by the Code of Honor, including complete honesty in the course and adhering to the dress and grooming standards. Cheating will not be tolerated. Sharing information about the exams and quizzes before they are taken is considered cheating. Studying together and doing assignments together (other than straight copying) is not cheating and is encouraged.

Course Routine: Students are expected to come to class prepared each time. Prior to each class meeting, students are expected to read and study the chapter material assigned for the day and complete the given assignment. Students are encouraged to ask questions and otherwise enter fully into class discussions. The instructor will normally devote part of each class meeting to lecture and part to demonstration of selected items from the assigned reading and homework materials. Regular attendance in class is expected and common courtesies to fellow classmates and the instructor should be shown at all times. Students are expected to arrive on time and refrain from visiting with classmates during class time.

Disability Statement: In compliance with applicable disability law, qualified students with a disability may be entitled to "reasonable accommodations." It is the student's responsibility to disclose to the SSD office any special need she/he may have and to provide the appropriate documentation of the disability. The SSD office is located inside the Learning Assistance Center, McKay Library 1st floor.

Evaluation: The student's final letter grade will be based on the following criteria:

1. Mid-Term Exams	300
2. Final Exam	150
3. Homework	50
4. Quizzes	50
5. Miscellaneous Projects	50
Total Points Possible	**600**

There are no grade improvement projects (extra credit). The following grading scale will be used unless, at the instructor's discretion, a modified curve is deemed necessary.

564 or more = A	480 - 497 = B-	360 - 389 = D+
540 - 563 = A-	450 - 479 = C+	330 - 359 = D
516 - 539 = B+	420 - 449 = C	300 - 329 = D-
498 - 515 = B	390 - 419 = C-	299 or less = F

Mid-term Exams: There will be 3 mid-term exams given during the course of the semester. They will all be administered in the Testing Center. Please take note of the dates for these tests in the course outline. It is the student's responsibility to be aware of the Testing Center hours and to make sure that adequate time is allowed for completing the exams. Each of the 3 mid-terms is worth 100 points.

Final Exam: The final exam will be held in the testing center during finals week. The final will be comprehensive in order to test retention of the full course material. It will also cover the material from the last chapters discussed in class. The final is worth 150 points.

Homework: The questions, exercises, and problems that are assigned as homework are found at the end of each chapter in the text. Homework assignments should be completed prior to the day that they are discussed in class based on the course outline. There are 14 homework assignments and 10 points possible for each assignment, regardless of the number of questions, exercises, or problems assigned. For final grading purposes, the lowest homework score will be dropped and the total homework points will be scaled down on a percentage basis to 50 possible points.

The homework will normally be corrected by the students in class. The homework will not be graded based on accuracy. It will be graded on being complete and timely. Any sloppy, negligent, or incomplete work will receive at least a 1 point deduction. In order to receive full credit for the homework assignment, the student must have attempted every part of every question, exercise, and problem before class.

Quizzes: Quizzes are used as stepping stones in helping prepare students for the exams. There will generally be a quiz after each chapter. Quizzes will be taken and corrected in class. There will be 14 quizzes worth 10 points each. For final grading purposes, the lowest quiz score will be dropped and the total quiz points will be scaled down on a percentage basis to 50 possible points.

Miscellaneous Projects: The miscellaneous projects consist of several different assignments designed to provide a well rounded educational experience. The projects will help the student work on oral and written communication skills and an ability to work in groups. The projects will both group and individual papers and presentations. Details and dates will be announced by the instructor during class. For final grading purposes, the total points on the projects will be scaled down on a percentage basis to 50 possible points.

Course Outline: The following represents a tentative schedule for this course. The instructor reserves the right to make changes, deletions, corrections, or additions at any time. If any changes are made, adequate disclosure will be made in class.

Date	**Assignments/Homework**	**Class Discussion**	**Quiz/Test/Projects**
Wed 01-10-01		Ch 1 - Intro to Business and Accounting
